

IBRO Advanced School of Neuroscience Malaysia

KPT/JPT/DFT/US/B04 Co. No. 458601-U (Date of establishment: 20 March 2000)

3 September – 3 October 2014

**Functional Genomics, Behavioural Neuroscience,
Molecular Morphology & Neuroimaging**

The second IBRO Advanced School of Neuroscience will be held at Monash University Malaysia. This one-month long program encompassing the region's pioneering cutting-edge work in live cell imaging, neurogenomics, confocal imaging, laser capture micro dissection and behavioral analysis will keep young neuroscientists abreast with advances in key areas of neuroscience research besides providing a platform for them to meet and access high-profile minds within the neuroscience research arena.

There will also be a one day Neuroscience Symposium co-organised by NeuroMalaysia Society held on 27th September 2014, with presentations by young researchers from the Asia-Pacific Region.

Organised by

Professor Ishwar Parhar
Director, Brain Research Institute
(BRIMS)

Head of Neuroscience
Jeffrey Cheah School of Medicine and
Health Sciences
Monash University Malaysia
