Theme: Biomedical

11:25-11:50 **Talk 3: Biomedical research for postpartum depression**

Dr. Mageswary Sivalingam, Brain Research Institute (BRIMS), Jeffrey Cheah School of Medicine and Health Sciences, Monash University Malaysia

Theme: Industry

11:50-12:15 **Talk 4: Single cell analysis techniques to understand neurological disorders – working towards precision health**

Mr. Keefe Chee, BD Biosciences (Singapore)

CLOSING REMARK & PHOTO SESSION

12:15-12:30 A/Prof Dr. T Valliammai Jayanthi, Clinical School Johor Bahru (CSJB), Jeffrey Cheah School of Medicine and Health Sciences, Monash University Malaysia

Speakers

**Assoc. Prof. Dr. Martien Snellen,
Consultant Perinatal Psychiatrist, Mercy Perinatal,
Mercy Hospital for Women, Victoria, Australia**

Dr. Martien Snellen is a Perinatal Psychiatrist who works at the Mercy Hospital for Women and in Private Practice in Melbourne Australia. He is a perinatal psychiatrist with more 20 years of experience. He is a member of the Albert Road Clinic Medical Advisory Committee, a lecturer and first Year Coordinator Monash University Masters of Psychological Medicine. He has published many research articles, books and book chapters in reputable journals and publications.

**Prof Dr. Jamiyah Bt Hassan,
Visiting Lecturer and Consultant Obstetrician & Gynaecologist
University Technology Mara Sg. Buloh, Selangor**

Prof Dr. Jamiyah is a medical doctor with more than 30 years of experience and currently is a visiting lecturer at UiTM and in Private practice. She has served as a Senior Consultant and Feto-maternal specialist in the obstetrics and gynaecology department in University Malaya Medical Centre (UMMC). She has held many reputable positions nationally and internationally throughout her services. Her research interest is in obstetrics and contraception, and she published many research articles, books and book chapters.

**Dr. Mageswary Sivalingam,
BRIMS, Jeffrey Cheah School of Medicine & Health Sciences,
Monash University Malaysia**

Dr. Mageswary Sivalingam is an assistant lecturer at JCSMHS under Brain Research Institute (BRIMS), Monash University Malaysia. Her research interests involve negative emotion and related psychiatric disorder such as post-traumatic stress disorder (PTSD), depression, and it's associated neurodegenerative disease. Currently she has embarked her research on postpartum depression, looking into biomarker for early prognosis.

**Mr Keefe Chee,
BD Biosciences Singapore**

Keefe Chee is a Consultant, and Applications Product Manager, leads the applications support team for Central South Asia & Japan. He has played an active role in the education of best practices and adoption of flow cytometry across Asia. Advancing dimensionalities is one of his key motivation, such as breaking the 30 colour 'barrier' back in 2017 - 2018 and contributing to metabolic flow (met-flow) in 2019- 2020. Keefe is currently a credential-maintained Specialist in Cytometry with the American Society of Clinical Pathology (ASCP).
